Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-19**, drawn to a motorcycle body frame, classified in class 180, subclass 219.
 - II. **Claim 20**, drawn to a method for manufacturing a body frame, classified in class 29, subclass 897.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

Here, the process to manufacture a motorcycle body frame can also be used to make frames of types of structures, such as another type of vehicle, or a machine. And, a motorcycle body frame may be made by another different process such as assembly of different frame components than that provided in these claims.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
